PRESS RELEASE

Anametrics Holdings Limited Founder Dr. Chutamas Signs Landmark Agreement with China Ultra Super Critical Technology Provider

January 9th, 2015

KUALA LUMPUR, MALAYSIA— January 9, 2015— Exchange Ceremony on the Joint Venture Partnership between Anametrics Holdings Limited and Oceanwide Energy Holdings Company Limited.

On the Global Marketing and Investments of the latest Ultra Super Critical (USC) technology was held at the Grand Hyatt Hotel, Kuala Lumpur. This strategic relationship was

On the right-hand side of Dr. Chutamas Vongvorakit stand Chairman of Oceanwide Energy Qin Dingguo and his team members; on the left-hand side stand Mr. Nazifuddin Dato' Sri Najib and Anametrics senior management team.

witnessed by the Corporate Advisor of Anametrics - Mr. Nazifuddin Dato' Sri Najib. Anametrics Holdings Limited (AHL) has selected its strategic power generation partner Oceanwide Energy Company Holdings Limited (OECH) for global energy project that marks China's first integration of a joint-venture and promote high-efficiency, clean, and USC power generation technology and other energy generating technology.

The whole initiative is mooted by a Thai Social Entrepreneur Dr. Chutamas Vongvorakit recognize Oceanwide Energy commitment on sustainable growth in energy efficiency market. Dr Chutamas – the founder of Anametrics, who is an ardent promoter of social and environmentally impact issues stress the importance of eradicating poverty, and shift our nation away from dirty fossil fuels and toward cleaner, renewable sources of power. Her recent assignments in rally support, and to finance Oceanwide Energy in

building ultra-supercritical (USC) power plants by pursuing emission reductions through employment of more efficient and higher-capacity power stations. It is meeting the needs of the present without compromising the needs of the future. She believes clean energy should be used to drive economic growth and help the pursuit green and sustainable future of power production. Future energy sustainability is about finding the balance between a growing economy, the need for environmental protection and social responsibilities in order to provide an improved quality of life for current and future

generations. Since the beginning of the 21st century, China has made great advancements in improving coal-fired power generation. Over the last few years the CO2 emissions reduction of new USC plants is even better, around 15% to 17%. This is off-the-shelf technology that handles base-load, produces cheap electricity, and reduces emissions. “This part of the world is a developing region with limited grid interconnection, so the additional power generated by Oceanwide Energy project will be tremendously important in supporting growth,” said Mr. Qin Dingguo, Chairman of Oceanwide Energy. “We expect the plant to provide cost-efficiencies over its life cycle, along with the fuel flexibility and USC capabilities needed to support the world’s fuel conservation and renewable technology initiatives.”

Background
